Product Requirements Document (PRD)

1. Overview

The ESS Pay section is a high-frequency, high-impact area for employees, covering salary, payslips, taxation, declarations, and reimbursements. The current design lacks consistency, clarity, and intuitive information hierarchy, resulting in suboptimal user experience and increased dependency on support.

This PRD outlines the requirements for revamping the ESS Pay section UI to deliver a modern, consistent, and user-friendly experience aligned with usability and design best practices.

2. Problem Statement

Current Challenges

- Information is not presented in a standardized or predictable layout across sections.
- Users find it difficult to quickly understand key salary, tax, and reimbursement information.
- Card and table views are inconsistent in structure, labels, and hierarchy.
- Important actions (View, Download, Add, Upload) are not clearly discoverable.
- Excessive cognitive load due to dense layouts and unclear visual grouping.

Impact

- Poor user experience for employees.
- Increased support tickets related to payslips, tax declarations, and reimbursements.
- Reduced confidence in payroll accuracy and transparency.

3. Goals & Objectives

Primary Goals

- Improve usability and clarity of the ESS Pay section.
- Standardize information presentation across all Pay-related modules.
- Enable employees to quickly understand salary, tax, and reimbursement details.

Success Metrics

- Reduction in Pay-related support tickets.
- Increased engagement with Tax Declaration and Reimbursement sections.
- Faster task completion (view payslip, submit declaration, upload proof).

4. Scope of Revamp

In-Scope Modules

- Pay Dashboard
- Salary Structure

- Salary Slips
- Taxation Overview
- Tax Declarations (Other Exemptions & House Property)
- Tax Calculation & Monthly Breakdown
- Reimbursements (List & Popups)
- Reports

Out of Scope

- Backend payroll calculation logic
- Policy or compliance rule changes

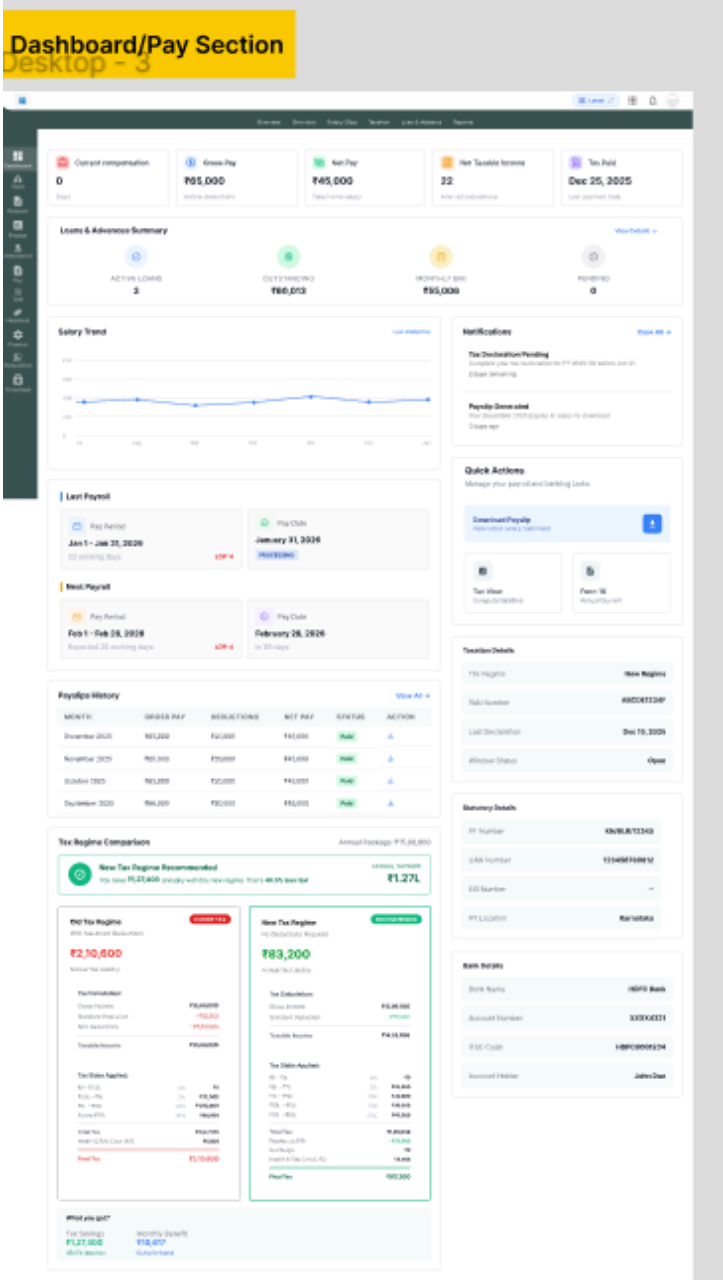
5. Design Principles

- Consistency: Uniform layout, colors, labels, and actions across sections.
- Clarity: Clear hierarchy highlighting key figures first.
- Actionability: Primary actions prominently visible.
- Scannability: Users should grasp key information within 5–10 seconds.
- Accessibility: Adequate contrast, readable font sizes, and clear icons.

6. Functional Requirements

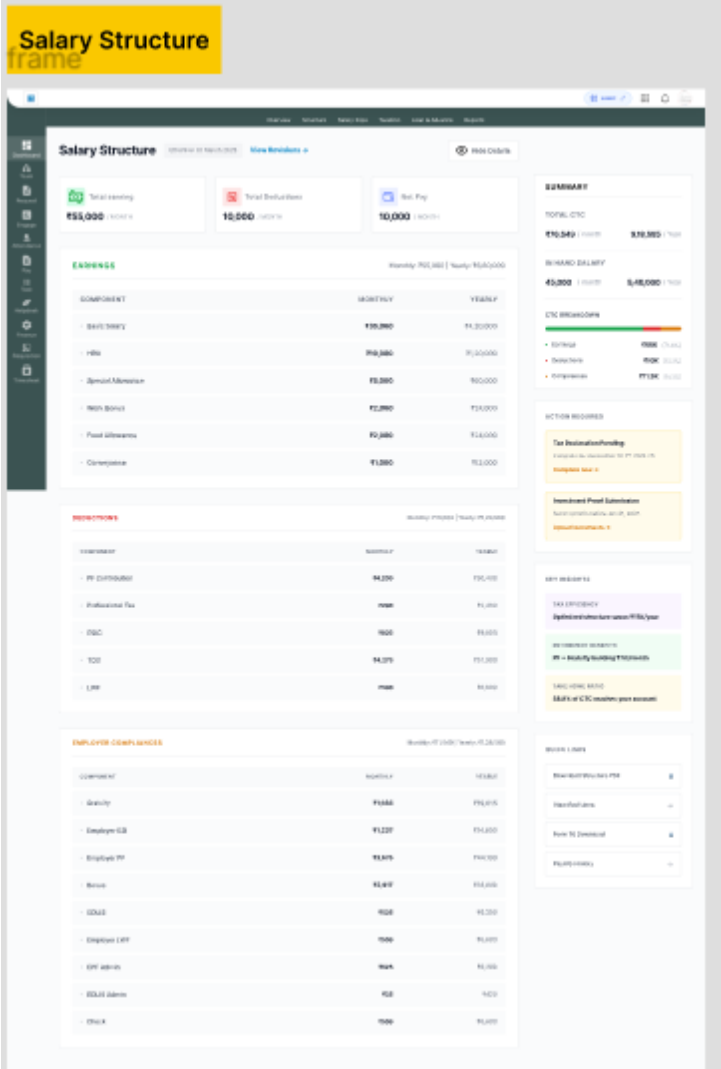
6.1 Pay Dashboard

- Display high-level summary cards:
  - Gross Pay
  - Net Pay
  - Taxable Income
  - TDS
- Unified card design with consistent typography and color usage.
- Salary trend graph with simplified labels and tooltips.
- Quick actions panel (Download Payslip, Tax View, Form 16).
- Tax Regime Comparison



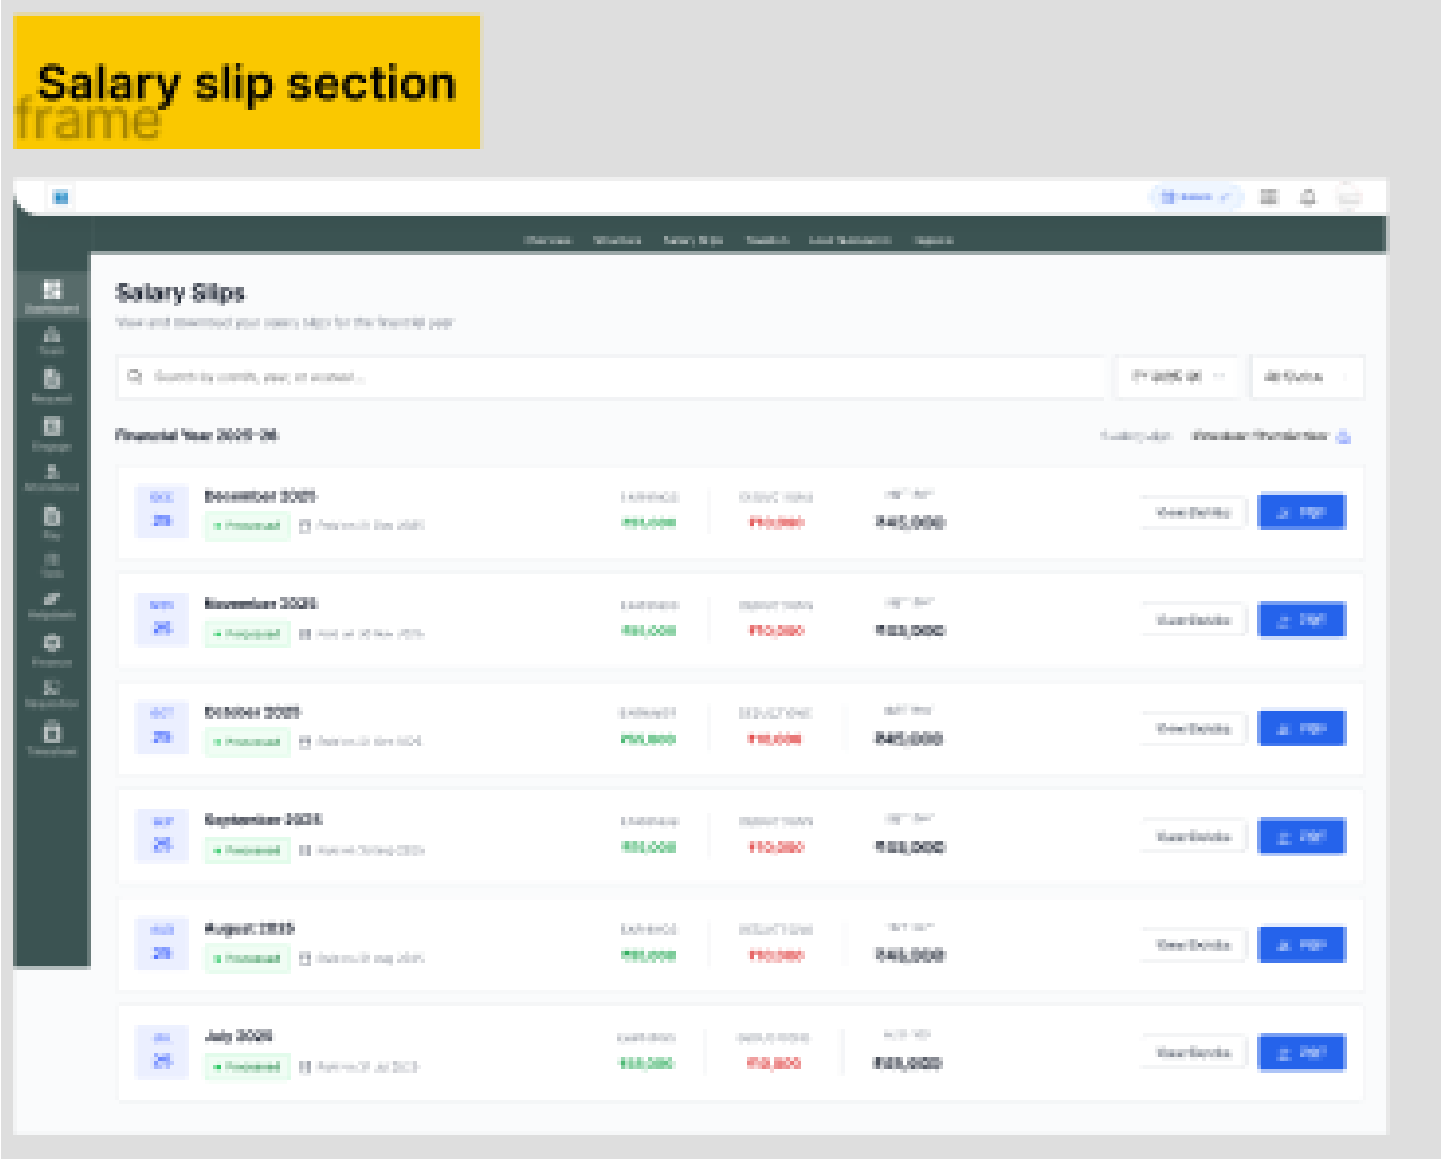
6.2 Salary Structure

- Clear separation of:
  - Earnings
  - Deductions
  - Employer Contributions
- Monthly and yearly values shown side by side.
- Sticky summary panel with Total CTC and Net Pay.
- View Salary Revision
- Salary Restructure



6.3 Salary Slips

- Table-based layout with:
  - Month
  - Earnings
  - Deductions
  - Net Pay
  - Status
- Consistent action buttons (View | Download).
- Filters for Financial Year and Month.



6.4 Taxation, Reimbursements, Loan & Advance – Unified Overview

The **Taxation, Reimbursements, Loan, and Advance** modules in ESS are redesigned to deliver a **single, cohesive, and intuitive financial experience** for employees. The revamp focuses on standardization, clarity, and ease of use, enabling users to understand their financial data, take actions confidently, and reduce dependency on support.

Overview & Summary

A unified summary displays:

- Total Outstanding Amount
- Active Loans Count
- Total Borrowed Amount
- Repaid Amount

This enables employees to quickly understand their financial obligations.

6.4.1 Tax Declarations – Other Exemptions & House Property

Tax declarations are presented using standardized layouts to improve clarity and usability.

Card View

Each declaration is displayed as a uniform card containing:

- Section Name
- Claimed Amount
- Approved Amount
- Status
- Primary actions: **Edit / Delete**

Cards follow a consistent hierarchy, making it easy to scan and compare declarations.

Table View

- Standardized columns across all declaration types
- Clear and consistent status indicators using **color + text**
- Action buttons placed uniformly for predictability

6.4.2 Tax Calculation & Monthly Breakdown

The Tax Calculation section is designed to bring transparency and confidence to employees.

- Step-wise tax calculation flow explaining how tax is derived
- **Total Tax Payable** prominently highlighted
- Monthly TDS breakdown displayed in a clean, easy-to-read table
- Options to **Download Summary** and **Print Report** for compliance and reference

This ensures employees clearly understand how their tax liability is calculated.

6.4.3 Reimbursements

The Reimbursements module is optimized to be action-oriented and self-explanatory.

Reimbursement Listing

Summary cards provide a quick snapshot of:

- Total Claimed
- Approved
- Pending
- Rejected

Popups & Actions

- **View Reimbursement:**
  Read-only modal showing full details along with a clear approval and audit trail.
- **Add Reimbursement:**
  - Step-based form flow

    - Mandatory field indicators
    - Proof upload with clear guidance on supported file types and size limits

6.4.4 Loan & Advance Views

Card View

Each loan or advance is shown as a card with:

- Loan / Advance Type
- Approved Amount
- Outstanding Amount
- EMI Amount
- Tenure
- Status
- Primary actions: **View Details /Download**

Table View

- Standardized columns including:
    - Request date
    - Requested Amount
    - Approved Amount
    - Interest Rate
    - Tenure
    - Status
    - Actions
- Clear status indicators using consistent color and text patterns

Transparency & Actions

- Easy access to repayment schedules and loan history
- Clear indication of approval, ongoing, and closed loans
- Predictable placement of actions for better usability

Overall Outcome:

The redesigned **Taxation, Reimbursements, Loan & Advance** experience delivers:

- Consistent and standardized information presentation
- Improved transparency and trust in financial data
- Faster comprehension and reduced cognitive load
- A modern, self-serve experience that minimizes support dependency

This revamp ensures employees can confidently manage their salary, tax, reimbursements, and borrowings from a single, intuitive interface.

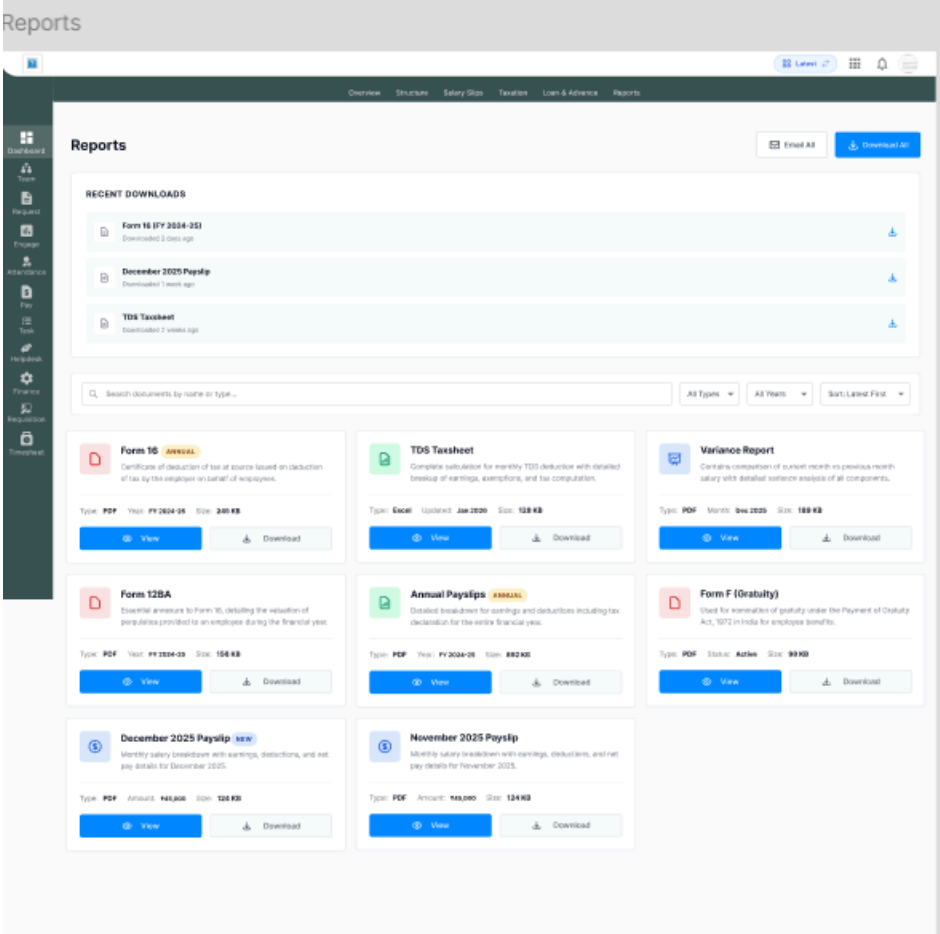
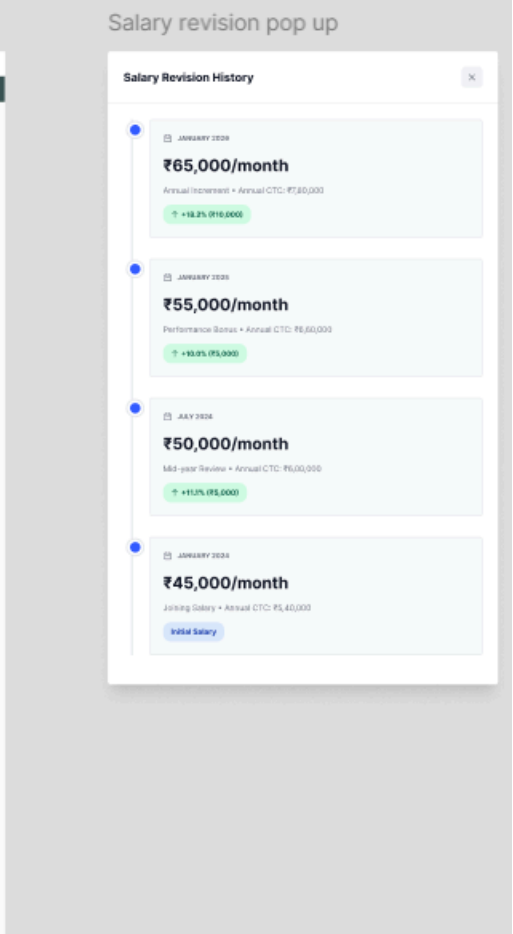
6.5 Reports

Report Listing Page

- Reports should be displayed in a standardized card layout.
- Each report card must include:
  - Report Name
  - Short Description (1–2 lines)
  - Report Category (Payroll, Tax, Compliance, Statutory)
  - File Format (PDF / Excel)
  - Last Generated Date





6.5 Dependencies

- Final design sign-off from UX team.
- API readiness for consistent data mapping.
- QA validation for data accuracy post UI changes.
- Final design approval form Product Manager.

6.6 Risks & Mitigation

Risk	Mitigation
User confusion during transition	Release notes + in-app hints
Data mismatch perception	Clear labels and tooltips
Performance issues	Optimize API calls
